

Notice 2011/2

Amendment to Class Rules Interpretation 2011/1

The following Class Rules shall be enforced at Zoom8 World Championships 2011 in Hanko

Interpretation 2011/1. Use of an electronic compass – Notice 2011/1 at 20.7.2011

The International Zoom8 Class Rules state about use of compass:

C.2.3 Optional

a) *One fixed compass. If electronic, it may only have heading and timer functions. **Any memory functions are forbidden.** The compass may be mounted on any part of the deck or in the cockpit provided that the hull cavity is not pierced by anything other than the fasteners. The compass shall not be fitted to the inspection ports.*

b) *One compass that may not be fixed to the boat. If electronic, it may only have heading and timer functions. **Any memory functions are forbidden.***

Technical committee states that use of an electronic compass similar to TackTick T060, that is electronic and has a memory function is not allowed.

Amendment to Interpretation 2011/1

The "memory functions" in TackTick model T060 is, opposite to original wording of Interpretation 2011/1, currently under reinspection at Technical Committee. Allowing or disallowing the future use of that specific compass model and other similar models may need rewording of the Zoom8 Class Rules to improve the readability of the Class Rules.

The use of TackTick ST060 Micro Compass model is temporarily allowed at Zoom8 World Championships 2011 in Hanko.

The use of TackTick ST070 Micronet Race Master model is not allowed.
